Outside Idea From T. S. Briskin of Sutton Research Corporation

The 5-gram samples of a cellulosic smoking product from Sutton Research Corporation have been received and we will proceed with the various analyses as soon as we review their patents.

In the meantime, I took the liberty and I requested from Dr. H. Wakeham a larger sample of this material. Dr. Wakeham agreed to contact Dr. T. S. Briskin of Sutton Research Corp. with such a request.

A request to Mr. W. Cridlin and his office was also made to review the H. Silberman and T. S. Briskin patents covering oxidized cellulose in smoking articles and determine any possible infringements.
